Comments, Questions, and Difficulties:**Difficulties:**

Could not figure out what to place in the “Design Review” section of the website other than a link to the powerpoint slides.

Lack of inter-team communication this week helped lead to two items not being completed.

Did not know how to submit a website URL (rather than a local copy) that did not contain a ‘~’. Are we provided webspace special for this project? If so, how would we access it?

Comments:

Implement Buttons/Map Function task is well under way.
